2. Olodaterol

Olodaterol (inhalation)

Generic name: olodaterol (inhalation) [*OH-loe-DAT-er-ol*]**Brand name:** [Striverdi Respimat](#)**Dosage form:** inhalation aerosol (2.5 mcg/inh)**Drug class:** [Adrenergic bronchodilators](#)[Medically reviewed](#) by Drugs.com on Jun 21, 2024. Written by [Cerner Multum](#).[Uses](#) [Side effects](#) [Warnings](#) [Before taking](#) [Dosage](#) [Interactions](#)

What is olodaterol?

Olodaterol inhalation is used to control the symptoms of chronic obstructive pulmonary disease (COPD), including [chronic bronchitis](#) and [emphysema](#).

Olodaterol may also be used for purposes not listed in this medication guide.

Olodaterol side effects

Get emergency medical help if you have **signs of an allergic reaction**: hives; difficult breathing; swelling of your face, lips, tongue, or throat.

Olodaterol may cause serious side effects. Call your doctor at once if you have:

- tremors, nervousness, chest pain, fast or pounding heartbeats;
- [wheezing](#), choking, or other breathing problems after using olodaterol;
- worsening breathing problems;
- **high blood sugar**--increased thirst, increased urination, [dry mouth](#), fruity breath odor; or
- **low potassium level**--leg cramps, [constipation](#), irregular heartbeats, fluttering in your chest, numbness or tingling, muscle weakness or limp feeling.

Common side effects of olodaterol may include:

- [cold symptoms](#) such as stuffy nose, sneezing, [sore throat](#);
- cough, [shortness of breath](#), chest discomfort;
- diarrhea;
- dizziness;

- pain or burning when you urinate;
- [back pain](#), [joint pain](#); or
- rash.

This is not a complete list of side effects and others may occur. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

Warnings

Olodaterol inhalation is for use only in people with chronic obstructive pulmonary disease (COPD) and should not be used to treat asthma.

Olodaterol inhalation is not a rescue medicine. It will not work fast enough to treat a bronchospasm attack.

Seek medical attention if your breathing problems get worse quickly, or if you think your medications are not working as well.

Before taking this medicine

You should not use olodaterol if you are allergic to it. **Olodaterol is for use only in people with COPD and should not be used to treat asthma.**

Tell your doctor if you have ever had:

- heart problems, [high blood pressure](#);
- diabetes;
- a seizure; or
- a thyroid disorder.

Tell your doctor if you are pregnant or breastfeeding.

Olodaterol is not approved for use by anyone younger than 18 years old.

How should I use olodaterol?

Follow all directions on your prescription label and read all medication guides or instruction sheets. Use the medicine exactly as directed. **Using too much of olodaterol can cause life-threatening side effects.**

Use olodaterol at the same time each day, even if you feel well.

Read and carefully follow any Instructions for Use provided with your medicine. Ask your doctor or pharmacist if you do not understand these instructions.

Use only the inhaler device provided with your medicine or you may not get the correct dose. Use the new inhaler each time you get your prescription refilled.

Olodaterol is not a rescue medicine for bronchospasm attacks. Use only fast-acting inhalation medicine for an attack. Seek medical attention if your breathing problems get worse quickly, or if you think your medications are not working as well.

Do not change your dose or stop using your medicine without your doctor's advice.

Store at room temperature away from moisture and heat. Do not freeze.

Olodaterol dosing information

Usual Adult Dose for Chronic Obstructive Pulmonary Disease:

-5 mcg (2 inhalations) orally once a day

Use: Maintenance bronchodilator treatment of airflow obstruction in patients with chronic obstructive pulmonary disease (COPD), including chronic [bronchitis](#) and/or emphysema

 [Detailed Olodaterol dosage information](#)

What happens if I miss a dose?

Use the medicine as soon as you can, but skip the missed dose if it is almost time for your next dose. **Do not** use two doses at one time.

Do not use the medicine more than once in a 24-hour period.

What happens if I overdose?

Seek emergency medical attention or call the Poison Help line at 1-800-222-1222. **An overdose of olodaterol can be fatal.**

Overdose symptoms may include chest pain, fast or irregular heartbeats, nervousness, tremor, muscle cramps, feeling light-headed, and [fainting](#).

What should I avoid while using olodaterol?

Avoid getting olodaterol in your eyes.

Do not use a second inhaled bronchodilator that contains olodaterol or a similar medicine (such as [formoterol](#), [arformoterol](#), [indacaterol](#), [salmeterol](#), or [vilanterol](#)).

What other drugs will affect olodaterol?

If you also use a short-acting bronchodilator, do not use it daily while you are using olodaterol. Use the short-acting bronchodilator only for a sudden bronchospasm attack.

Other drugs may affect olodaterol, including prescription and over-the-counter medicines, vitamins, and [herbal products](#). Tell your doctor about all your current medicines and any medicine you start or stop using.
