# Pamine Forte

**Generic name:** [methscopolamine](#) [ *METH-skoe-POL-a-meen* ]

**Brand names:** [Pamine](#), Pamine Forte

**Drug class:** [Anticholinergics / antispasmodics](#)

[Medically reviewed](#) by Drugs.com on Jul 22, 2024. Written by [Cerner Multum](#).

[Uses](#) [Side effects](#) [Warnings](#) [Before taking](#) [Dosage](#) [Interactions](#)

## What is Pamine Forte?

Pamine Forte reduces the secretions of certain organs in the body, such as the stomach.

Pamine Forte is used to reduce stomach acid secretion to help control peptic ulcers. **Pamine Forte does not help heal an ulcer.**

Pamine Forte may also be used for purposes not listed in this medication guide.

## Pamine Forte side effects

Get emergency medical help if you have **signs of an allergic reaction**: hives; difficult breathing; swelling of your face, lips, tongue, or throat.

**Pamine Forte may cause serious side effects. Stop using Pamine Forte and call your doctor at once if you have:**

- painful or difficult urination;
- little or no urination;
- pounding heartbeats or fluttering in your chest;
- severe diarrhea; or
- confusion, nervousness.

**Common side effects of Pamine Forte may include:**

- headache;
- drowsiness, dizziness;
- blurred vision;
- nausea, vomiting, [constipation](#), bloating;

- dry mouth, decreased sense of taste;
- decreased sweating; or
- trouble sleeping.

This is not a complete list of side effects and others may occur. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

## Warnings

You should not take Pamine Forte if you have glaucoma, a bladder obstruction or other urination problems, [myasthenia gravis](#), severe constipation, or a stomach or [bowel obstruction](#) (including [paralytic ileus](#) or toxic megacolon).

## Before taking this medicine

You should not use Pamine Forte if you are allergic to it, or if you have:

- glaucoma;
- bladder obstruction or other urination problems;
- a stomach or bowel obstruction (including paralytic ileus);
- myasthenia gravis; or
- severe constipation, or colitis or toxic megacolon.

Tell your doctor if you have ever had:

- an [enlarged prostate](#);
- heart problems;
- [high blood pressure](#);
- liver or kidney disease;
- a thyroid disorder; or
- a colostomy or ileostomy.

Older adults may be more sensitive to the effects of this medicine.

It is not known whether this medicine will harm an unborn baby. Tell your doctor if you are pregnant or plan to become pregnant.

Pamine Forte can slow breast milk production. Tell your doctor if you are breast-feeding a baby.

Pamine Forte is not approved for use by anyone younger than 18 years old.

## How should I take Pamine Forte?

Follow all directions on your prescription label and read all medication guides or instruction sheets. Your doctor may occasionally change your dose. Use the medicine exactly as directed.

Pamine Forte is usually taken 30 minutes before meals and at bedtime. Follow your doctor's dosing instructions.

Your doctor will need to check your progress on a regular basis.

Store at room temperature away from moisture and heat.

 [Detailed Pamine Forte dosage information](#)

## What happens if I miss a dose?

Take the medicine as soon as you can, but skip the missed dose if it is almost time for your next dose. **Do not** take two doses at one time.

## What happens if I overdose?

Seek emergency medical attention or call the Poison Help line at 1-800-222-1222.

Overdose symptoms may include behavior changes, feeling restless, muscle weakness, loss of movement in any part of your body, fainting, or slowed breathing.

## What should I avoid while taking Pamine Forte?

Avoid becoming overheated or dehydrated during exercise and in hot weather. Pamine Forte can decrease sweating and you may be more prone to heat stroke.

Pamine Forte may cause dizziness or blurred vision and may impair your reactions. Avoid driving or hazardous activity until you know how this medicine will affect you.

Drinking alcohol with this medicine can cause side effects.

## What other drugs will affect Pamine Forte?

Pamine Forte slows the digestive tract, which can make it harder for your body to absorb other medicines you take by mouth. Tell your doctor if any of your oral medications do not seem to work as well while you are taking this medicine.

Using Pamine Forte with other drugs that make you drowsy can worsen this effect. Ask your doctor before using opioid medication, a sleeping pill, a muscle relaxer, or medicine for anxiety or seizures.

Tell your doctor about all your other medicines, especially:

- atropine;
- cold or allergy medicine that contains an antihistamine (Benadryl and others);
- medicine to treat [Parkinson's disease](#);
- other medicine to treat excess stomach acid, [stomach ulcer](#), [motion sickness](#), or [irritable bowel syndrome](#);
- **bladder or urinary medicines**--[darifenacin](#), [fesoterodine](#), [oxybutynin](#), [tolterodine](#), [solifenacin](#); or
- **bronchodilators**--[aclidinium](#), [ipratropium](#), tiotropium, [umeclidinium](#).

This list is not complete. Other drugs may affect Pamine Forte, including prescription and over-the-counter medicines, vitamins, and [herbal products](#). Not all possible [drug interactions](#) are listed here.
