Hyzine

Generic name: [Hydroxyzine Injection](#) [*hye-DROX-i-zeen*]

Drug classes: [Antihistamines](#), [Miscellaneous anxiolytics](#), [sedatives and hypnotics](#)

[Medically reviewed](#) by Drugs.com. Last updated on May 10, 2024.

[Uses](#) [Before taking](#) [Warnings](#) [Dosage](#) [Side effects](#) [Overdose](#) [FAQ](#)

The Hyzine brand name has been **discontinued** in the U.S. If generic versions of this product have been approved by the FDA, there may be [generic equivalents available](#).

Uses of Hyzine:

- It is used to treat [anxiety](#).
- It is used to treat mood problems.
- It is used to treat [upset stomach](#) and throwing up.
- It may be given to you for other reasons. Talk with the doctor.

What do I need to tell my doctor BEFORE I take Hyzine?

- If you have an [allergy](#) to [hydroxyzine](#) or any other part of [Hyzine](#) (hydroxyzine injection).
- If you are allergic to Hyzine (hydroxyzine injection); any part of Hyzine (hydroxyzine injection); or any other drugs, foods, or substances. Tell your doctor about the allergy and what signs you had.
- If you have ever had a long QT on ECG.
- If you are in early pregnancy. Do not take Hyzine (hydroxyzine injection) during early pregnancy.
- If you are breast-feeding. Do not breast-feed while you take Hyzine (hydroxyzine injection).

This is not a list of all drugs or health problems that interact with Hyzine (hydroxyzine injection).

Tell your doctor and pharmacist about all of your drugs (prescription or OTC, natural products, [vitamins](#)) and health problems. You must check to make sure that it is safe for you to take Hyzine (hydroxyzine injection) with all of your drugs and health problems. Do not start, stop, or change the dose of any drug without checking with your doctor.

What are some things I need to know or do while I take Hyzine?

- Tell all of your health care providers that you take Hyzine (hydroxyzine injection). This includes your doctors, nurses, pharmacists, and dentists.
- Avoid driving and doing other tasks or actions that call for you to be **alert** until you see how Hyzine (hydroxyzine injection) affects you.
- Talk with your doctor before you drink alcohol or use other drugs and natural products that slow your actions.
- An unsafe heartbeat that is not normal (long QT on ECG) has happened with Hyzine (hydroxyzine injection). This may raise the chance of sudden death. Talk with the doctor.
- Unsafe heart problems and sometimes death have rarely happened when Hyzine (hydroxyzine injection) was given with alcohol or certain other drugs that may slow your actions. Talk with your doctor.
- If you are 65 or older, use Hyzine (hydroxyzine injection) with care. You could have more side effects.
- Tell your doctor if you are pregnant or plan on getting pregnant. You will need to talk about the benefits and risks of using Hyzine (hydroxyzine injection) while you are pregnant.

How is this medicine (Hyzine) best taken?

Use Hyzine (hydroxyzine injection) as ordered by your doctor. Read all information given to you. Follow all instructions closely.

- It is given as a shot into a muscle.

What do I do if I miss a dose?

- Call your doctor to find out what to do.

What are some side effects that I need to call my doctor about right away?

WARNING/CAUTION: Even though it may be rare, some people may have very bad and sometimes deadly side effects when taking a drug. Tell your doctor or get medical help right away if you have any of the following signs or symptoms that may be related to a very bad side effect:

- Signs of an allergic reaction, like **rash**; hives; **itching**; red, swollen, blistered, or peeling skin with or without **fever**; **wheezing**; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat.
- A heartbeat that does not feel normal.
- A **fast heartbeat**.
- Very bad dizziness or passing out.
- Trouble controlling body movements.
- Feeling confused.
- Rarely, a very bad skin reaction has happened with Hyzine (hydroxyzine injection). Signs include fever and many small skin spots within large areas of redness and swelling. Call your doctor right away if you have a rash or any of these signs.

- Tissue damage has happened with Hyzine (hydroxyzine injection). Sometimes, this has led to [surgery](#). Tell your nurse if you have any burning, color changes, pain, skin breakdown, or swelling where the shot was given.

What are some other side effects of Hyzine?

All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your doctor or get medical help if any of these side effects or any other side effects bother you or do not go away:

- [Dry mouth.](#)
- Feeling sleepy.

These are not all of the side effects that may occur. If you have questions about side effects, call your doctor. Call your doctor for medical advice about side effects.

You may report side effects to the FDA at 1-800-332-1088. You may also report side effects at <https://www.fda.gov/medwatch>.

If OVERDOSE is suspected:

If you think there has been an overdose, call your poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.

How do I store and/or throw out Hyzine?

- If you need to store Hyzine (hydroxyzine injection) at home, talk with your doctor, nurse, or pharmacist about how to store it.

Consumer Information Use and Disclaimer

- If your symptoms or health problems do not get better or if they become worse, call your doctor.
- Do not share your drugs with others and do not take anyone else's drugs.
- Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.
- Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so. Check with your pharmacist if you have questions about the best way to throw out drugs. There may be drug take-back programs in your area.
- Some drugs may have another patient information leaflet. Check with your pharmacist. If you have any questions about Hyzine (hydroxyzine injection), please talk with your doctor, nurse, pharmacist, or other health care provider.
- If you think there has been an overdose, call your poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.
