## Drug Facts

## Active ingredient

Levonorgestrel 1.5 mg

## Purpose

Emergency contraceptive

## Indications and Usage for Aftera

for women to reduce chance of pregnancy after unprotected sex (if a contraceptive failed or if you did not use birth control)

## Warnings

### Allergy alert

Do not use if you have ever had an allergic reaction to levonorgestrel

### Sexually transmitted diseases (STDs) alert

This product does **not** protect against HIV/AIDS or other STDs

## Do not use

- if you are already pregnant (because it will not work)
- for regular birth control

**Ask a doctor or pharmacist before use if you are** taking efavirenz (HIV medication) or rifampin (tuberculosis treatment) or medication for seizures (epilepsy). These medications may reduce the effectiveness of levonorgestrel.

**When using this product** you may have

- menstrual changes
- tiredness
- breast pain
- nausea
- headache
- vomiting
- lower stomach (abdominal) pain
- dizziness

**Keep out of reach of children.** In case of overdose, get medical help or contact a Poison Control center right away.

## Aftera Dosage and Administration

- **take as soon as possible within 72 hours (3 days) after unprotected sex. The sooner you take it the better it will work.**
- **if you vomit within 2 hours after taking the medication, call a healthcare professional to find out if you should repeat the dose**

## Storage and Handling

- **read the instructions, warnings and enclosed product leaflet before use**
- **do not use if carton is open or tear strip is removed or blister seal is broken or missing**
- store at 20-25°C (68-77°F)

## Inactive ingredients

colloidal silicon dioxide, corn starch, lactose monohydrate, magnesium stearate, potato starch, talc
