Warnings

Follow all directions on your medicine label and package. Tell each of your healthcare providers about all your medical conditions, allergies, and all medicines you use.

Before taking this medicine

You should not use aspirin, caffeine, and orphenadrine if you are allergic to aspirin, caffeine, or orphenadrine, or if you have:

- [glaucoma](#);
- a blockage in your digestive tract (stomach or intestines);
- a bladder obstruction or other urination problems;
- an [enlarged prostate](#);
- [myasthenia gravis](#); or
- problems with the muscles in your esophagus (the tube that connects your mouth and stomach).

Tell your doctor if you have ever had:

- a [stomach ulcer](#); or
- a bleeding or blood clotting disorder.

Tell your doctor if you are pregnant or breastfeeding.

Do not give this medicine to anyone with a fever, flu symptoms, or [chickenpox](#). **Aspirin can cause Reye's syndrome, a serious and sometimes fatal condition.**

Aspirin, caffeine, and orphenadrine is not approved for use by anyone younger than 12 years old.

How should I take aspirin, caffeine, and orphenadrine?

Follow all directions on your prescription label and read all medication guides or instruction sheets. Use the medicine exactly as directed.

Call your doctor if your symptoms do not improve, or if they get worse.

If you use this medicine long-term, you may need frequent medical tests.

Store at room temperature away from moisture and heat.

What happens if I miss a dose?

Take the medicine as soon as you can, but skip the missed dose if it is almost time for your next dose. **Do not** take two doses at one time.

What happens if I overdose?

Seek emergency medical attention or call the Poison Help line at 1-800-222-1222.

What should I avoid while taking aspirin, caffeine, and orphenadrine?

Avoid driving or hazardous activity until you know how aspirin, caffeine, and orphenadrine will affect you. Your reactions could be impaired.

Ask a doctor or pharmacist before using other medicines for pain, fever, swelling, or cold/flu symptoms. They may contain aspirin or other [salicylates](#).

What other drugs will affect aspirin, caffeine, and orphenadrine?

Other drugs may affect aspirin, caffeine, and orphenadrine, including prescription and over-the-counter medicines, [vitamins](#), and [herbal products](#). Tell your doctor about all your current medicines and any medicine you start or stop using.
