2. Mirabegron

Mirabegron

Generic name: mirabegron [*MIR-a-BEG-ron*]

Brand names: [Myrbetriq](#), Myrbetriq Granules

Dosage forms: oral granule for reconstitution, extended release (8 mg/mL), oral tablet, extended release (25 mg; 50 mg)

Drug class: [Urinary antispasmodics](#)

[Medically reviewed](#) by Drugs.com on Mar 26, 2025. Written by [Cerner Multum](#).

[Uses](#) [Side effects](#) [Warnings](#) [Before taking](#) [Dosage](#) [Interactions](#)

What is mirabegron?

Mirabegron is used **in adults** to treat [overactive bladder](#) with symptoms of frequent or urgent urination and [urinary incontinence](#). Mirabegron is sometimes used together with another medicine called [solifenacin](#) ([Vesicare](#)).

Mirabegron is used **in children** to treat neurogenic detrusor overactivity (NDO). Urinary [incontinence](#) caused by NDO is related to permanent nerve damage from conditions such as [multiple sclerosis](#) or spinal injury.

Mirabegron **tablets** may be used in children at least 3 years old. Mirabegron **granules** are for use in children at least 3 years old who also weigh at least 77 pounds (35 kilograms).

Mirabegron may also be used for purposes not listed in this medication guide.

Mirabegron side effects

Stop using mirabegron and get emergency medical help if you have **signs of an allergic reaction**: hives; difficult breathing; swelling of your face, lips, tongue, or throat.

Mirabegron may cause serious side effects. Call your doctor at once if you have:

- pain or burning when you urinate; or
- **dangerously high blood pressure**--severe [headache](#), blurred vision, pounding in your neck or ears.

Common side effects of mirabegron may include:

- painful urination;
- increased blood pressure;
- sinus pain, [sore throat](#);
- [constipation](#);

- headache; or
- [dry mouth](#) or fast heartbeats (when taken with solifenacin).

This is not a complete list of side effects and others may occur. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

Warnings

You should not use mirabegron if you have uncontrolled hypertension ([high blood pressure](#)).

Before taking this medicine

You should not use mirabegron if you are allergic to it.

Tell your doctor if you have ever had:

- high blood pressure;
- a bladder obstruction;
- trouble emptying your bladder (very little urine or a weak stream of urine);
- kidney disease; or
- [liver disease](#).

Tell your doctor if you are pregnant or breastfeeding.

Mirabegron should not be given to a child younger than 3 years old.

How should I take mirabegron?

Follow all directions on your prescription label and read all medication guides or instruction sheets. Use the medicine exactly as directed.

If you take mirabegron with solifenacin, take both medicines at the same time each day.

Take the mirabegron **tablet** with a full glass of water. Swallow the tablet whole and do not crush, chew, or break it.

An adult may take a mirabegron **tablet** with or without food. However, a child should take the tablet with food.

Both adults and children should take mirabegron **granules** with food.

A pharmacist will mix mirabegron **granules** into a **suspension** (liquid) before you receive the medicine.

Shake the **suspension** before you measure a dose. Use the dosing syringe provided, or use a medicine dose-measuring device (not a kitchen spoon).

If the **suspension** will not be used for 2 days or longer, shake the bottle vigorously for 1 minute each day to keep the granules thoroughly mixed.

Read and carefully follow any Instructions for Use provided with your medicine. Ask your doctor or pharmacist if you do not understand these instructions.

Your dose needs may change if you switch from using mirabegron tablets to using the suspension. **Avoid medication errors by using only the form and strength your doctor prescribes.**

Your blood pressure will need to be checked often.

It may take up to 8 weeks before your symptoms improve. Keep using the medication as directed and tell your doctor if your symptoms do not improve.

Store at room temperature away from moisture and heat. Throw away any unused mirabegron **suspension** after the [expiration date](#) on the medicine label has passed.

 [Detailed Mirabegron dosage information](#)

What happens if I miss a dose?

Use the medicine as soon as you can, but skip the missed dose if you are more than 12 hours late for the dose. **Do not** use two doses at one time.

What happens if I overdose?

Seek emergency medical attention or call the Poison Help line at 1-800-222-1222.

An overdose may cause pounding heartbeats or fluttering in your chest.

What should I avoid while taking mirabegron?

Follow your doctor's instructions about any restrictions on food, beverages, or activity.

What other drugs will affect mirabegron?

Tell your doctor about all your other medicines, especially:

- digoxin;
- [flecainide](#);
- [propafenone](#);
- solifenacin; or
- [thioridazine](#).

This list is not complete. Other drugs may affect mirabegron, including prescription and over-the-counter medicines, [vitamins](#), and [herbal products](#). Not all possible [drug interactions](#) are listed here.
