2. Diamox

Diamox

Generic name: [acetazolamide](#) [a-SEET-a-ZOLE-a-mide]

Brand names: Diamox, [Diamox Sequels](#)

Drug classes: [Carbonic anhydrase inhibitor anticonvulsants](#), [Carbonic anhydrase inhibitors](#)

[Medically reviewed](#) by Drugs.com on Aug 3, 2023. Written by [Cerner Multum](#).

[Uses](#) [Side effects](#) [Warnings](#) [Before taking](#) [Dosage](#) [Interactions](#)

The Diamox brand name has been **discontinued** in the U.S. If generic versions of this product have been approved by the FDA, there may be [generic equivalents available](#).

What is Diamox?

Diamox reduces the activity of a protein in your body called carbonic anhydrase. Blocking this protein can help reduce the build-up of certain fluids in the body.

Diamox is used in people with certain types of [glaucoma](#) to reduce the amount of fluid in the eye, which decreases pressure inside the eye.

Diamox is also used as a diuretic ("water pill") in people with congestive [heart failure](#), to reduce the build-up of fluid in the body. This build-up is called edema.

Diamox is also used to treat certain types of [seizures](#), and to treat or prevent altitude sickness.

Diamox may also be used for purposes not listed in this medication guide.

Diamox side effects

Get emergency medical help if you have **signs of an allergic reaction**: hives; difficult breathing; swelling of your face, lips, tongue, or throat.

Diamox may cause serious side effects. Call your doctor at once if you have:

- blood in urine or stools;
- a seizure (convulsions);
- loss of movement in any part of your body;
- **a blood cell disorder**--sudden weakness or ill feeling, fever, chills, [sore throat](#), mouth sores, pale skin, feeling tired

or short of breath, rapid heart rate, nosebleeds, bleeding gums;

- **liver problems**--nausea, upper stomach pain or swelling, tired feeling, loss of appetite, dark urine, clay-colored stools, [jaundice](#) (yellowing of the skin or eyes);
- **signs of metabolic acidosis**--confusion, [vomiting](#), lack of energy, irregular heartbeats;
- **signs of a kidney stone**--pain in your side or lower back, blood in your urine, painful or difficult urination; or
- **severe skin reaction**--fever, sore throat, swelling in your face or tongue, burning in your eyes, skin pain followed by a red or purple skin rash that spreads (especially in the face or upper body) and causes blistering and peeling.

Common side effects of Diamox may include:

- nausea, vomiting, loss of appetite, [diarrhea](#);
- numbness or tingling, especially in your arms and legs;
- [drowsiness](#), confusion;
- hearing problems, ringing in your ears;
- increased urination; or
- altered sense of taste.

This is not a complete list of side effects and others may occur. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

Warnings

You should not use Diamox if you have [cirrhosis](#), severe liver or kidney disease, an electrolyte imbalance, adrenal gland failure, or an allergy to Diamox or [sulfa drugs](#).

Before taking this medicine

You should not use Diamox if you are allergic to it, or if you have:

- severe [liver disease](#), or cirrhosis;
- severe kidney disease;
- an electrolyte imbalance (such as [acidosis](#) or low levels of potassium or sodium in your blood);
- adrenal gland failure; or
- an allergy to sulfa drugs.

To make sure Diamox is safe for you, tell your doctor if you have:

- severe breathing problems;
- angle closure glaucoma; or
- if you also take [aspirin](#) in high doses.

It is not known whether this medicine will harm an unborn baby. Tell your doctor if you are pregnant or plan to become pregnant.

[Acetazolamide](#) can pass into breast milk and may harm a nursing baby. You should not breast-feed while using this medicine.

Diamox is not approved for use by anyone younger than 18 years old.

How should I take Diamox?

Follow all directions on your prescription label. Your doctor may occasionally change your dose to make sure you get the best results. Do not use Diamox in larger or smaller amounts or for longer than recommended.

Your dose of this medicine will depend on the condition you are treating. If you take Diamox for congestive heart failure, your doctor may tell you to skip your medication for a day. **Follow your doctor's dosing instructions very carefully.**

Take this medicine with a full glass of water.

While using Diamox, you may need frequent blood tests.

Diamox may be only part of a complete treatment program that may also include other medications. Follow your doctor's instructions very closely.

Store at room temperature away from moisture and heat. Keep the bottle tightly closed when not in use.

 [Detailed Diamox dosage information](#)

What happens if I miss a dose?

Take the missed dose as soon as you remember. Skip the missed dose if it is almost time for your next scheduled dose.

Do not take extra medicine to make up the missed dose.

What happens if I overdose?

Seek emergency medical attention or call the Poison Help line at 1-800-222-1222.

What should I avoid while taking Diamox?

Diamox may impair your thinking or reactions. Be careful if you drive or do anything that requires you to be alert.

Avoid exposure to sunlight or tanning beds. Diamox can make you [sunburn](#) more easily. Wear protective clothing and use [sunscreen](#) (SPF 30 or higher) when you are outdoors.

What other drugs will affect Diamox?

Other drugs may interact with acetazolamide, including prescription and over-the-counter medicines, [vitamins](#), and [herbal products](#). Tell each of your health care providers about all medicines you use now and any medicine you start or stop using.

 [Diamox drug interactions](#) (more detail)

Does Diamox interact with my other drugs?
